

Discover the ReFace MOOC!

We are pleased to present you the Reface MOOC, available in 5 different languages (English, French, Slovak, Italian and Spanish). The online course aims to contribute to the adaptability and resilience of regions in order to enable them to thrive despite adversity and crises by enhancing the knowledge and skills of key stakeholders.

The MOOC will show you how regional actions can contribute to shaping the response to major economic, social and environmental challenges, and will provide you with suggested tools, methods and elements for effective integrated regional/local policies.

After completing the MOOC, you will be able to recognise different levels of regional resilience and its lifecycle phases. You will also get an insight into regional resilience planning, learn about the necessity to engage and cooperate with different stakeholders, measure the impact of the planned measures and funding.

Testing REFACE Modules

Reface project partners are completing the testing the Reface MOOC, inviting key stakeholders to register on the platform and share their feedback for finalising the resource. Would you like to contribute too? Then, do not hesitate to [contact us!](#)

The Road Map

The **road map** "Supporting a Resilient Region is a tool for the Sustainable Communities" is a standalone document, providing advice and tools through a proactive approach to crises. Designed primarily for the public administration, it can be useful for any subject interested in regional development by explaining the steps that regions and communities can take to build and strengthen their resilience. The resource will be soon available on the project website!
